## Wholesale Harvesting Catalogue

*"Wildcrafted Botanicals at Competitive Prices"*

The Wildcraft Forest is Canada's only wild tea plantation. We specialize in creating tea blends made from wild botanicals. We also operate a botanical wholesale division located in the south central interior of British Columbia. Wildcraft Forest offers high quality roots, leaves, herbs and barks to manufacturing and research communities at reasonable prices direct from our local harvesting operations. We are a locally owned and operated business. We depend on our own harvesting effort which is supported by a community of wildcrafters dedicated towards thoughtful and sustainable wild lands stewardship and harvesting, which then insures quality and freshness within our products.

**We believe that this region is one of planet Earths greatest medicine chests and we have dedicated our lives to protect it.** All roots, herbs, leaves and barks are legally and ethically obtained with the utmost respect for nature and the property of others. Our harvesting areas cover over 15,000 acres of private and public lands. The Wildcraft Forest trains wildcrafters in order for them to be certified to properly harvest and manage ecosystems in order to promote healthy populations of roots, herbs, leaves and barks.

- We offer dried and fresh wild botanicals in bulk or pre-packaged.
- Contract harvests available in Whole, Cut, Cut/Sift or Powder Form.
- Wildcrafted Roots, Herbs, Leaves and Barks available in 50 lb quantities or more.

## WHOLESALE HARVESTING SERVICES

*"Wildcrafted Botanicals at Competitive Prices"*

At the Wildcraft Forest we have been wildcrafting wilderness botanicals for 30 years. We utilize all things wild in fine craft, wellness and culinary products including a growing family of artisan tea blends. Now we're offering wholesale harvesting services from within a vast area in British Columbia, Canada. We offer high quality roots, herbs and barks from our local harvesting operations to manufacturing and research communities at reasonable prices.

At the Wildcraft Forest we harvest wild herbs and botanicals from various mountain and forest areas in the Monashee Mountain Range. We also propagate wild and historical herbs and fruits using *permaculture* methods at our plantation. We are a specialized provider of organic, non-GMO and wild crafted fresh and dried botanicals which we hand crush and hand pack at our own premises located at our Wild Tea Plantation, delivering a quality product every time. Our products are free from dust, chaff, powder and fillers. Our herbs do not include any stabilizers, colorings, preservatives or synthetic chemicals

The Wildcraft Forest has an advisory committee that we call "*Watershed Intelligence*" which is made up of experts including herbalist's, naturopaths, environmental and dietary consultants and degree holding research analysts that provide us with leading edge advice on botanicals and the environment in which they grow. We offer universities and other research bodies access to our harvest areas so that they may study plant behaviors and ecosystems.

### ***Plan ahead to safeguard your quality and supply***

Let our experts at the Wildcraft Forest support your business by helping you set up a *contract growing schedule* for the herbs and botanicals you need. We have the ability to contract grow or wildcraft harvest over one hundred different botanicals. Our catalogue contains a list of the botanicals that we currently harvest from our plantation and wild lands. We also can help you plan to grow items that may not be listed in our catalogue.

*To discuss our current harvest, prices or **growing to order** give us a call at our Wildcraft Forest Discovery Centre at 250-547-9812 and we will figure out a plan to deliver quality products to you at a time when you need them most.*

*Harvesting Map: The highlighted areas represent the vast Wildcraft Forest harvesting area in the Okanagan and Monashee. Located 100 km northeast of Kelowna, British Columbia*
